

- After running the code we are prompted to write the secret message and password.
- Once we do so we get an encrypted image with the hidden message

```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS

stegnography.py'
Enter secret message:UPIis212aditi
Enter password:8106

```

- Then we are prompted to write the same password for decryption and we get the secret message if the password is correct.

```

Enter password for Decryption8106
Decryption message: UPIis212aditi
PS C:\Users\Aditi Aswal\OneDrive\Desktop\stegno>

```
